# Index to Volume 175

Araki Y, Nakamura K, Chijiiwa Y, Nawata H: Expression of the placenta-specific, 100 kDA *ras* GTPase activating protein in several human cancer cell lines and normal human tissues 195–204
Argilés JM, *see* Hulstijn M *et al.*
Arora N, *see* Madan T *et al.*
Athias P, *see* Durot I *et al.*
Ayotte P, *see* Lagueux J *et al.*

Badr MZ, *see* Youssef JA *et al.*
Benito E, Bosch MA: Impaired phosphatidylcholine biosynthesis and ascorbic acid depletion in lung during lipopolysaccharide-induced endotoxaemia in guinea pigs 117–123
Blachier F, *see* Guihot G
Bolaños-García VM, Soriano-García M, Mas-Oliva J: CETP and exchangeable apoproteins: Common features in lipid binding activity 1–10
Bosch MA, *see* Benito E
Botelho MJ, *see* Poulin ML *et al.*
Burkley M, *see* Dinda S *et al.*

Camici O, Corazzi L: Phosphatidylserine translocation into brain mitochondria: Involvement of a fusogenic protein associated with mitochondrial membranes 71–80
Chijiiwa Y, *see* Araki Y *et al.*
Chiu I-MJ, *see* Poulin ML *et al.*
Choy PC, *see* Lynn EG *et al.*
Corazzi L, *see* Camici O

Dewailly E, *see* Lagueux J *et al.*
Dinda S, *see* Hurd C *et al.*
Dinda S, Kodali-Gali S, Sevilla L, Burkley M, Hurd C, Moudgil VK: Inhibition of proliferation of T47D human breast cancer cells: Alterations in progesterone receptor and p53 tumor suppressor protein 81–89
Durot I, Athias P, Oudot F, Grynberg A: Influence of phospholipid long chain polyunsaturated fatty acid composition on neonatal rat cardiomyocyte function in physiological conditions and during glucose-free hypoxia-reoxygenation 253–262

Easwaran KRK, *see* Jagannatha Rao KS
El Bachir Affar EL, *see* Lagueux J *et al.*

Fernández-Renart M, *see* Nuñez A
Flynn DC, *see* Guappone AC

Gelman IH, *see* Nelson PJ
Grynberg A, *see* Durot I *et al.*
Grynberg A, *see* Sentex E *et al.*
Guappone AC, Flynn DC: The integrity of the SH3 binding motif of AFAP–110 is required to facilitate tyrosine phosphorylation by, and stable complex formation with, Src 243–252
Guihot G, Blachier F: Histidine and histamine metabolism in rat enterocytes 143–148

Herman M, *see* Hurd C *et al.*
Hofmann GA, *see* Nambi P *et al.*
Hulstijn M, López-Soriano J, López-Soriano FJ, Argilés JM: Lipogenesis in rat tissues following carbohydrate refeeding: Spleen lipogenesis is modulated by insulin 149–152
Hurd C, *see* Dinda S *et al.*

Hurd C, Underwood B, Herman M, Iwasaki K, Kloosterboer HJ, Dinda S, Moudgil VK: Characterization of ligand binding, DNA binding and phosphorylation of progesterone receptor by two novel progesterone receptor antagonist ligands 205–212

Iwasaki K, *see* Hurd C *et al.*

Jadhav AL, Ramesh GT: Pb-induced alterations in tyrosine hydroxilase activity in rat brain 137–141
Jagannatha Rao KS, Easwaran KRK: $^{27}$Al-NMR studies of aluminum transport across yeast cell membranes 59–63

Kaul S, Krishnakantha TP: Influence of retinol deficiency and curcumin/turmeric feeding on tissue microsomal membrane lipid peroxidation and fatty acids in rats 43–48
Khandelwal RL, *see* Sulakhe PV *et al.*
Kloosterboer HJ, *see* Hurd C *et al.*
Ko KM, *see* Mak DHF
Kodali-Gali S, *see* Dinda S *et al.*
Komarov AM, Kramer JH, Tong Mak I, Weglicki WB: EPR detection of endogenous nitric oxide in postischmic heart using lipid and aqueous-soluble dithiocarbamate-iron complexes 91–97
Kramer JH, *see* Komarov AM *et al.*
Krishnakantha TP, *see* Kaul S
Kumar C, *see* Nambi P *et al.*

López-Soriano FJ, *see* Hulstijn M *et al.*
López-Soriano J, *see* Hulstijn M *et al.*
Lagueux J, El Bachir Affar EL, Nadeau D, Ayotte P, Dewailly E, Poirier GG: A Microassay for the detection of low levels of cytochrome P O-deethylation activities with alkoxyresorufin substrates 125–129
Lucien A, *see* Sentex E *et al.*
Lynn EG, Choy PC, Magil A, O K: Uptake and metabolism of lipoprotein-X in mesangial cells 187–194

Madan T, Arora N, Usha Sarma P: Ribonuclease activity dependent cytotoxicity of Asp fl, a major allergen of *A. fumigatus* 21–27
Magil A, *see* Lynn EG *et al.*
Mailaisse WJ, *see* Vanhoutte C *et al.*
Mak DHF, Ko KM: Alterations in susceptibility to carbon tetrachloride toxicity and hepatic antioxidant/detoxification system in streptozotocin-induced short-term diabetic rats: Effects of insulin and Shisandrin B treatment 225–232
Malaisse WJ, *see* Scruel O *et al.*
Mas-Oliva J, *see* Bolaños-García VM *et al.*
Mattern MR, *see* Nambi P *et al.*
Meera R, *see* Vishwanath V *et al.*
Morris TE, *see* Sulakhe PV *et al.*
Moudgil VK, *see* Dinda S *et al.*
Moudgil VK, *see* Hurd C *et al.*
Murata T, Shinya N, Yamaguchi M: Expression of calcium-binding protein regucalcin mRNA in the cloned human hepatoma cells (HepG2): Stimulation by insulin 163–168
Muthulakshmi V, *see* Vijayalakshmi T *et al.*

Nadeau D, *see* Lagueux J *et al.*
Nakamura K, *see* Araki Y *et al.*
Nambi P, Mattern MR, Wu H-L, Pullen M, Nuthulaganti P, Hofmann GA, Kumar C 29–35
Narayanan PR, *see* Vishwanath V *et al.*
Nawata H, *see* Araki Y *et al.*
Nelson PJ, Gelman IH: Cell-cycle regulated expression and serine phosphorylation of the myristylated protein kinase C substrate, SSeCKS: Correlation with culture confluency, cell cycle phase and serum response 243–252
Nuñez A, Fernández-Renart M: Proteolysis activated protein kinase in *Dictyostelium discoideum* 177–185
Nuthulaganti P, *see* Nambi P *et al.*

O K, *see* Lynn EG *et al.*
Oblonczek G, Szymanski G: Influence of ryanodine on the mechanical restitution and on the post-extrasystolic potentiation of the guinea-pig ventricular myocardium 213–223

Oudot F, *see* Durot I *et al.*

Pato MD, *see* Sulakhe PV *et al.*
Phan TD, *see* Sulakhe PV *et al.*
Poirier GG, *see* Lagueux J *et al.*
Poulin ML, Botelho MJ, Chiu I-M: Cloning and interspecies comparisons of three newt (*Notophthalmus viridescens*) fibroblast growth factor receptor sequences 11–19
Pullen M, *see* Nambi P *et al.*
Puvanakrishnan R, *see* Vishwanath V *et al.*

Ramesh GT, *see* Jadhav AL

Sachdanandam P, *see* Vijayalakshmi T *et al.*
Scruel O, Sener A, Malaisse WJ: Glucose-induced positive cooperative of fructose phosphorylation by human B-cell glucokinase 263–269
Sener A, *see* Scruel O *et al.*
Sener A, *see* Vanhoutte C *et al.*
Sentex E, Sergiel JP, Lucien A, Grynberg A: Trimetazidine increases phospholipid turnover in ventricular myocyte 153–162
Sergiel JP, *see* Sentex E *et al.*
Sevilla L, *see* Dinda S *et al.*
Shinya N, *see* Murata T *et al.*
Song WO, *see* Youssef JA *et al.*
Soriano-García M, *see* Bolaños-García VM *et al.*
Srinivasan K, *see* Suresh Babu P
Sulakhe PV, Vo XT, Morris TE, Pato MD, Khandelwal RL: Protein phosphorylation in rat cardiac microsomes: Effects of inhibitors of protein kinase A and of phosphatases 109–115
Sulakhe PV, Vo XT, Phan TD, Morris TE: Phosphorylation of inhibitory subunit of troponin and phospholamban in rat cardiomyocytes: Modulation by exposure of cardiomyocytes to hydroxyl radicals and sulfhydryl group reagents 99–107
Suresh Babu P, Srinivasan K: Influence of dietary capsaicin and onion on the metabolic abnormalities associated with streptozotocin induced diabetes mellitus 49–57
Szymanski G, *see* Oblonczek G

Tong Mak I, *see* Komarov AM *et al.*

Underwood B, *see* Hurd C *et al.*
Usha Sarma P, *see* Madan T *et al.*

Vanhoutte C, Sener A, Malaisse WJ: Subcellular distribution of hexokinase isoenzymes in pancreatic islet cells exposed to digitonin after incubation at a low or high concentration of D-glucose 131–136
Vijayalakshmi T, Muthulakshmi V, Sachdanandam P: Salubrious effect of *Semecarpus anacardium* against lipid peroxidative changes in adjuvant arthritis studied in rats 65–69
Vishwanath V, Meera R, Puvanakrishnan R, Narayanan PR: Fate of *Mycobacterium tuberculosis* inside rat peritoneal macrophages *in vitro* 169–175
Vo XT, *see* Sulakhe PV *et al.*

Weglicki WB, *see* Komarov AM *et al.*
Wu H-L, *see* Nambi P *et al.*

Yamaguchi M, *see* Murata T *et al.*
Youssef JA, Song WO, Badr MZ: Mitochondrial, but not peroxisomal, $\beta$-oxidation of fatty acids is conserved in coenzyme A-deficient rat liver 37–42
